SYLLABUS

AI – powered Digital Marketing Mastery Course

Module 1: Introduction to ChatGPT and Prompt Engineering

Introduction to ChatGPT and its applications

Understanding prompt engineering: What are prompts and how they influence AI responses

Crafting effective prompts: Principles and examples

Fine-tuning prompt parameters: Length, context, and specificity

Module 2: Intermediate Techniques and Integrations

Hands-on practice: Writing prompts for specific tasks and goals

Advanced prompt engineering strategies: Bias reduction, context manipulation, and style transfer

Module 3: Advanced Prompt Engineering and AI Integration

Leveraging ChatGPT API: Integrating with various platforms and applications Real-world applications: Chatbots, content generation, customer support

Module 4: Exploring AI Tools and Resources

Introduction to AI tools for business: Overview and selection criteria

Natural language processing (NLP) tools: Sentiment analysis, text summarization, and language translation

Module 5: AI Tools for Business

Image recognition and processing tools: Object detection, image tagging, and content generation Predictive analytics and data visualization tools: Regression analysis, trend forecasting, and data storytelling

Module 6: Understanding WordPress Basics

Practical demonstrations and case studies using free Al applications

Introduction to WordPress: Understanding its architecture and capabilities

Module 7: Building a WordPress Website

Setting up a WordPress site: Hosting, domain selection, and installation Customizing themes and layouts: Design principles and best practices

Module 8: Functionality and Progression for a Successful Website

Adding functionality with plugins: SEO optimization, security, and performance enhancement

Content creation and management: Creating pages, posts, and media uploads

OutcomeofActivity

Upon completion of the rather exhaustive curriculum mapped out here for the MBA 1st Year, participants emerged with a robust skill set at the junction of AI applications and business management, specifically for modern enterprises. The students developed a comprehensive understanding of ChatGPT and its applications. They also learned to write and fine-tune all concepts pointed out in prompts and thus got maximum impact on AI responses. They learned about advanced techniques of bias reduction and style transfer—very useful for bringing out optimum interactions with AI in business. Moreover, the incorporation of ChatGPT API into real-world applications—chatbots, content generation, and customer support—afforded hands-on experience to the students in deployment within the context of an organizational framework for AI solutions. Parallel to this were the various AI instruments and resources critical in business, such as NLP techniques that were relevant for sentiment analysis and text summarization, image recognition, and predictive analytics. These were some of the tools used in effectively analyzing data to derive insights and forecast trends critical in strategic decision-making. It then got into the basics of WordPress and how one could use it in website development, customization, and the functionality extension through plugins. By the end of this course, students were well equipped in harnessing both AI and WordPress in business to drive success by making informed decisions and offering innovative digital solutions.
